**This is a picture of me at Marbo barracks. I was assigned to the open area, with no air conditioning. You can see the fixed louvers that were open all the time. I lived there for three months while I was looking for “off base housing” so I could bring my wife over. The contamination levels at Marbo are legendary.**

**This picture is of the abandon Marbo Barracks as it looks today. They were built “typhoon proof” out of concrete.**
