Greetings veterans and interested parties,

With all the red tape and the red tape responses to red tape about the criminal activity of the American Government using Chemical Weapons (Agent Orange) against an enemy of the State as well as American Service men and women I am like every other veteran suffering from the effects of it. and am still mad as can be.

How is it possible that there are three letter associations that are still not only in the dark but are ignorant of the real issues of A.O, veterans and the American Governments position on A. O. thru the V.A.

I am a member of the DAV in Orlando Florida. The members there consist of brave veterans that have given all they were asked to give and then some only to find out that the American Government was engaging in Chemical warfare at American Servicemen's and women's expense. As a member of the DAV I was appalled to here a DAV representative relate to the world at large that the DAV is not aware that Vietnam Veterans are fighting battles with the V.A> and have been for over 40 years. My personal battle is now 43 years old.

Kelly has sent me a couple of URL's that are totally worth reading by anyone that has a heart connected to their brain and that can form an opinion. Remember, American Servicemen and women suffering from A.O. have been suffering for 40+ years. Don't you think that is long enough?
