Hi Van

How many have you had to respond? You know there were a lot of people sent to Guam. My DVA man told me that was why I was having so much trouble because if one gets it then that would open up all kinds of case's. The planes were kc 130's and 135's cargo planes, Almost all the planes were going to Vietnam some were going to OKINAWA, THAILAND, We loaded helicopters only when we were making a new supply yard and I have a picture that shows a field after we sprayed it. We did used a vehicle most of the time a truck with a sprayer in the back, but you had to hold the sprayer by hand. I have two pictures that I want you to look at, 1 is the field after we sprayed and the other is one of the yards with the drums AO and AW. The drums are marked orange rings for AO, white rings for Agent White, and blue rings for Agent Blue. I'm the handsome guy on the forklift! What do you think? Is this proof?

Bob
